Word about the author:

As

all our lovely children born

every second

all over this sacred planet, Love child is also born

to the Planet Of Love.

At school Love Child plays violin and, although he prefers Dvořák and his Humoresque, he gets to play Vivaldi's Violin Concerto in D Minor for his first solo violin concerto. Seeing all this seats from the stage and imagining already playing and exchanging these amazing energies with the audience he could not stand such a beautiful feeling.

Love Child

dies of love
for the first time in this life.
He lives through the school days, first love affairs, friendship, sports, university and family life, working in the library of Academy of Sciences and Arts Love Child self educates. His wonderful wife presents the sun of his Universe Of Love. While "working" and making Art works and organizing his Art exhibitions he is watching his dear child grow to be a good human being.

In the
company of his best man

whom everybody calls Jesus, Love Child

learns about the world of sounds, goodness, and
the magical universal love. Huxley, Leonardo,
Castaneda, Beethoven, Yes, Hesse, Buddha,
Dead Can Dance, Shiva, Herbert, Clarke,
Hawking, Heisenberg, Pythagoras,
Mahabharata, Toltec, Newton,
Internet, Kaku, lead him to

the realization:

ISAAC ASIMOV WRITES

THE TRUTH !

THE KNOWLEDGE IS ONE

As all men of this evolution's human

development phase, Love Child serves the army,

luckily during the peaceful period., and when the time of a
turmoil washes the shores of the Earth with his family he
lives through immigration, temptations, and sufferings.
He hunts, builds home for his family, does the land
and then thousand different jobs, from digging
ditches to befriending Academics, Llamas,
presidents of the countries, free masons,

and the crowned heads.

Love Child dies

of heart in flesh three times

during this life on the Planet Of Love,
and

God sends him back to write this book

in more compassionate English language

than the one he discovers in this life

Love Child learns, meditates,
and
decides:
he will also make a contribution to the MAN search for

THE THEORY OF EVERYTHING

Love Child is practicing various ascetic disciplines.

Infinite times

Love Child dies in the pharaoh sarcophagus
in the King's Chamber of the Great Pyramid of Giza.

He lives the life of Jesus and suffers and dies on the Cross,
and resurrects.
He lives the life of the scientist that made the man and woman
in

To be born again

# In your heart

Circumnavigating

The Universe

Of Love

dedicated to

Άγιος Νικόλαος,

Nikola Tesla speaks:
I cancel space and time.

"Within the Earth exist energies

of Joyfulness, Peacefulness, and Love;

their expressions are growing flower,

food that it provides,

and

all that makes Man homeland, the Earth.

I

spent years

searching

for

the way those energies

could help people.

Beauty and

the fragrance of roses

could be used

as

a medicinal therapy

and the sun rays as food.

Life

has endless number of aspects,

and the scientist's duty is to find them

in every form of the matter.

Three things are essential in this.

Everything I ever do is search for them.

I know

that I may not find them,

but I shell never

give up.

One

is

the question of food.

Which star, or the Earth energy

to feed to the hungry of the Earth.

Which wine to give to all that are thirsty,

to make their hearts rejoice, and

to make them understand

they are gods?

I
know
that you can feed five thousand with five breads,
and that the water
could
turn
into
wine.
I know,
also
that
the
hungry,
and thirsty
have killed the one

that fed them, and gave them to drink,

and that they would do the same,

if

he appears again.

Second thing

is

how
to change
the energies
of
evil and suffering,

human life passes in?

From time to time they appear like a pandemic,

from the very depths of the universe;

in this century

those

diseases from the Earth

spread throughout the universe.

The one who is called The Asian Light

knows the answer to this question.

He is no longer here,

and the evil and suffering

are so shiny

that they became the only sky above us...

The third thing is:

is there

an

extra

light in the universe?

I have discovered a star which,

according to all astronomical and mathematical laws

could disappear,

and, as it seems, nothing else would change.

That star is in this galaxy.

Her light

could
be

compressed

to a density so that
it could fit into the

ball
smaller than the apple, and heavier than the Solar System.

She is the source of life

which

starts springing

when life on the Earth

starts to fade, and

light off.

The

Persian
carried that

ball
in his hand, but
He

was

the one,

on
this
planet.

After him

remained
only
the temples
in which

Fire

does not burn any more.

Religion and philosophy teach
that man could become
Christ, Buddha,
and
Zarathustra.

The thing I am searching for
is creaser, bigger, and
more impossible.

That is:

What to do,

so that every man

in the universe

IS BORN

LIKE
JESUS,
BUDDHA
AND
ZARATHUSTRA

# Prophecy

Greatest prophet is born again.

For the first time of his existence he is born on the Earth.

He speaks:

"At one time, the specie naming itself "Homo Sapiens"- "Wise Man",

will start

a civilization on the Earth.

Generation after generation over millions of years,

with the help from all dimensions of life,

“Wise Man” is improving own being

through bravery and heroism

for love.

-:-

His own blood will be

both red and blue in color, and

he will build a civilization of red and blue

deadly opposed aspects of the same life,

Two differently colored bloods

in every “Wise Man”

Two sons

of the same

God

Iaue and Eloim,
the cat and the bear,

are building a civilization

projecting their minds

based on two animal principals

onto two great organs of the “Wise Man’s” own body

These two nations will battle each other

inside the “Wise Man's” own body

until “Wise Man” realizes

he lives the planetary civilization

of frightened, aggressive,

suffering

“Wise Man” beings.

-:-

his organism,

his social organism

will frequently

be conflicted

and

in-juried

cause

of all the sins
he blindly commits.

-:-

Listen “Wise Man” consciousness!

The ultimate consciousness

The Ultimate Love

lays gently

Loving Father’s hand

onto both heads of two sons,

Iaue, and Eloim, the cat and the bear

and

enlightens different colored eyes

of the same head

-:-

The Ultimate Consciousness

Acts

Honoring the gift

Of The Ultimate Love

And marries them

in peace and

love

and

the song

our angels,

our children

all of our birds,

our musicians

sing together

continues

now

-:-

Greatest Prophet warns:

“Wise Man”

will become the most dominant specie of the Earth.

This Specie, "Wise Man”

Will Endanger Life

Of The Only Planet

We Live On

-:-

Greatest prophet

projects

other messages onto the indestructible tablets

whose meaning embraces the advanced “Wise Man.”

It is too early for humans to discover them,
so he hides the tablets deep in the cave,

-:-

he knows

soon he will die,

for the first time on the Earth.
-:-

Early

spring sun is rising,
but he is too weak to get up.

Yesterday's hunting didn't go well,

he nearly lost his life.

Tired,

tribe members are still sleeping.

Lying warm, under the thick fur, through the entrance to the cave

he oversees the wide plain with distant mountains bathed in the early morning light.

Raising his eyes he sees the enormous ball of fire falling across the sky, and behind

the mountains.

For a moment it disappears from his sight, and
the beautiful colorful lights are now slowly forming
a humungous mushroom cloud lighting up the horizon.

Stony floor underneath him violently quakes in the deepest
rumble
throwing him truly amazingly easy against the cave wall.

Turning everything found in the open in the ashes

fiery wind roars by,

burning mountain walls and the entrance of the cave.
As one, grabbing the kids tribe is raced by the fire.

They run

deeper and deeper
towards

the almost forgotten

OLDEST OF ALL

WATER OF

LOVE

-:-
Time

of constant rain, floods and hunger comes.

Following, comes the longest winter anybody remembers.

Constantly moving over valleys and the mountains,

through the horrendous icy storms,

TRIBE FINALLY REACH THE FROZEN OCEAN

Fish saves lives.

-:-

Hunters
are returning
to the cave where
the women have already
lit the fires ready to start skinning
the animals.

Men are working with women, cutting, cooking, smoking,
and salting meat;

some are cleaning, repairing old and making new arrows, tightening their bows,
sharpening spears,
and

some are
resting.

One

of the hunters

approaches the cave wall

carrying a piece of carbonized wood, and

starts drawing scenes from today's hunt, men throwing

spears and shooting the arrows toward running animals.

Among the hunters on the same hunting field

he draws

a giant levitating humanlike creature

with a transparent sphere

around his
big eyed
head.
-:-

One of the hidden tablets carries a message:

"Following

the apocalyptic events

that are extinguishing

life,

“The Space Gardeners”

start a new life on those planets.

THEY ARE HELPING GOOD SPIRITS

MAKE A NEW ATTEMPT,

GENERATING HEAVENS

WITHIN THIS

REALM.

-:-

From “Wise Man” consciousness:

The Anunnaki
And The Tree Of Creation

From the Gnostic* fragment about the creation of man:

“And
the first ruler

saw the female virgin

standing with Adam,

and saw

that the living,

luminous afterthought

had been shown forth within her.

And Aldabaoth became filled with lack of acquaintance.

Now,

the forethought of the entirety

learned of this,

and

sent certain beings,

who caught life (Zoë) out of Eve.

And the first ruler

defiled her,

and

begot on her

two sons –

the first

and the second,

Eloim and Iaue.

Iaue has the face of a cat,

Eloim has the face of a bear;

One is just, the other is unjust:

Iaue is just, Eloim is unjust.

It established Iaue in charge of fire and wind,

and established Eloim in charge of water and earth.

-:-

And it called them by the name of
Cain and Abel,
with trickery in mind.

-:-

“And to the present day sexual intercourse,
which originated from the first ruler,

has remained.

And
in the female
who belonged to
Adam it sowed a seed of desire;

and by sexual intercourse it raised up

birth

in the image of the bodies.

-:-

And
it supplied
them some of its
counterfeit spirit.

-:-

And it established

the two rulers in charge of realms,

so that they rule over the cave...”

-:-

Wendy
is
flying from bed to bed,
waking up dear sleepy children,
first grade elementary school students,
she accompanies on their first camping trip.

Some of them are lying in their beds

still sensing

dream worlds with all their senses.

Children are gently moving little fingers over their eyes

orienting lovely seeing, out of their dream worlds into the day light.

Some children are up and properly dressed already tidying up their beds,

the children of the strict parents.

The ones that take the longest time to wake up have gentle and kind parents

which are doing their best to help them live their own natural ways.

Most of her attention and loving care Wendy dedicates to children

whose strict parents' behavior stresses innocent children,

who are not able to understand that those stresses

are not their, but their parent's
sacred
duty to deal with.

For good, stop

projecting it

onto the poor children,

cause the real father of all the children

is the universal consciousness, and their mother is

the universal love, and this true parents are protecting them

FOR GOOD

This stresses accumulate, and if untreated at the early age, create
problems that might make children permanently unhappy.
Wendy does her best to teach children to solve them

in all imaginable, creative ways.

Children love her so much
that a few of them
named themselves
Peter Pan, dress green
and wear the hats, each with
a bird feather sticking upward on their sides.

-:-

From time to time

they hold Wendy’s hands thrilled,

while "flying together"

above the lawn.

-:-

While waiter serves the
customers of a charming restaurant,
tiny drop of water splashes the table surface.

Cheerful conversation and heartfelt laughter beautifies

the whole ambient.

Few tiniest wine flies circle over the tables, invisible
to guests enjoying their own companies.

Fly’s beautiful little souls
form a pair of wings
allowing them
amazingly
precise
flight.

Such fine positioning

in space and time

enables the swift fulfillment of their mind.

One of them flies through the restaurant lamp's soft beam of a light.

Beam astonishingly refracts through her intricately composed tiny wings.

This time, infrared range of the spectrum does not have its usual qualities.

Infrared beam’s photons travel through the fly's eye, and

for an infinitesimal period of time

change her optical nerve's

natural perception.

As

her optical nerve

does not react in the characteristic way,
it
now

sends the wrong information about the stimuli.

Fly brain's information processing centre

informs fly’s whole being

and instead of

presenting

a tiny drop of water

on the surface of one of the

charming restaurant’s tables

she is just about to land on

as the "water hill,”

it presents that the “hilly” area as hard, safe for landing.

Landing, fly touches the surface that quickly bends underneath her weight,
and

forms the water
socks gripping fly's legs
with its super strong adhesion power,

pulling fly's legs strongly bellow the water surface, in perfectly performed

bow of wavy, mass atomic movement.

Fly is devastated by the Water Spirit's behavior,

so she cannot move.

Her whole life flashing in front of her mind’s eye

while paralyzed she is pulled

below

the
water surface.

And at that moment,

the enormous

cylindrical wooden object

dives bellow her and the new,

much stronger waves it produces

move
her upwards, a bit away from the log.

Still frightened, now she starts feeling

the Good Spirits laying so gently

the Universal Power Of Hope

to radiate from her heart,

moving within her

upwards,

now

her head
is
above the water.

Swimming

strongly through the rough waters
she
reaches, and climbs on top of the log.

Thank God I am saved.

-:-

Attentive

goodhearted restaurant's guest

saved her life using a toothpick and

a second of his “leisure time.”

Act of grace.

-:-

Chapter 2

# Raise

Carefully stretching

birch bark's outer ring that he peeled

in continuous lengths last summer, he places

now well dried birch bark, between

the double gunwales and
saws them together
using

spruce roots.

He is making ribs from white cedar.

Inserting ribs, he is stretching out the birch bark,

forming the final shape of the canoe.

He starts cooking

spruce resin

He

will use for gumming.

Sitting around, the whole tribe

watches him

finishing the first canoe they ever saw.

Their faces express amazement and adoration.

Few tribe members

watch very carefully

what he is doing,

remembering

every detail

of

the
whole
process.

When he
lays the oar
into
the first boat
tribe ever
made,

Medicine Man
enters the cave and
starts comforting rhythm
of an old Algonquin song
sang among them since
the dawn of time.

Women
are
quickly

gathering children
closer to men
sitting around the fire,

and

they all join in, singing:

"We are the stars
which sing,

We sing with

our light.

We are
the
birds
of fire,
We fly over the sky.

Our light is a voice

We make a road

For the spirits
to pass over

For the spirits
to pass over.

We are like the wind,
Wrapped in luminous wings.

We make a road

For the spirits
to pass over

For the spirits

to pass
over.

Nikola
goes to the kitchen to
prepare refreshments, and Sing
is heading toward the living room.
Entering, Sing always gets an
impression
that this is well developed miniature
scientific laboratory full of books,
advanced computers, measuring,

analyzing,

and all sorts of electronic
instruments.
There are also various scientific
apparatus of an unknown purposes,
and a music producing equipment also.
Everything is well organized and Nikola
conducts serious scientific research projects
in this relatively small Metropolis's apartment.

This
time, however,
Sing gets an impression
that a very comprehensive
scientific research project
is in progress here.

He approaches

centre
of
attention.

Through strong
magnifying glass he observes
some unknown object placed beneath it,
and notices nothing extraordinary.

Much more carefully
concentrating
his
attention

he uses microscope
for the second time,
and
the unknown, starts
entering his mind.

Celestial formations

Overwhelmed,

he "dives out of it," and awaits

Nikola with millions

of questions.

-:-

Close to the throng
of the centralized quarters,
dressed in a warm woolen combination,
Zoë is making her last preparations before going out,

glancing frequently toward the clock.

In a window,
paws furled underneath her,
cat Wichien-maat watches the dance
of the neon light reflections from wet sidewalks.

Rushing people under umbrellas are stepping over many puddles

sending showers of tiny rain drops in all directions, further reflecting

now interweaving street lights within the other images of the realm.

Finishing with her preparations she caresses Wichien-maat when

she hears the noise and quick steps on the stairways.
Yawning, Wichien-maat turns

towards her,
stretches
her body,
and jumps down
onto the carpet and right into her arms.

NOSTALGICALLY, SHE WISHES TO BE IN A SUNNY LAND FULL OF FLOWER SMELLS,

AND

CHEERFUL BIRD TWITTER

She didn't even finish her thought, and realizing her wish pictures from the carpet

start coming to life, creating the new reality. The natural ornaments
started becoming

three-dimensional, fragrant, and she feels dewy wetness
over her shanks.

Bathing under the morning sunbeams
distant mountains are
waking up.

Slight
bending of tree branches
finds its justification in a breeze
coming along the valley where winding,
crystal stream is accompanying their trail,
gently caressing Zoë and Wichien-maat's

walking feet.

Feeling of surprise

bows,

honoring
the most pleasant
radiating sensation of the

rejuvenating energies coming from

the very source of all life,
and
her heart sings
rejoicing.

Walking
down
the trail

Zoë looses
Wichien-maat

from her sight,

but then the cat jumps
out
of the area with the

valley flowers,

hunting
flies.

Bonum

started the project
based on
the ancient Herman Hesse's

idea

described in his book

"Das Glasperlenspiel" ("The Glass Pearl Game").

He is reaching the advanced stages of the project's development.
Elm Thorohm, the director of the West Universe's Thorohm Foundation,
helping the under developed, densely populated militant Galactic suburbia planets,

contacts him.

Elm offers Bonum temporary position of

the Executive Developing Undergod Of The

Conscious Realization,

exclusively responsible for saving the Earth (Gaia, Terra).

Beside numerous problems “Wise Man” caused to his own planet, its climate change,

advanced pollution, extinction of life forms, he also widespread greed, dictatorships,

inequality, poverty, and suffering of millions of beings of his own specie,

planet is in grave danger of starting the final self-annihilating war.

With its more than generous income, position would enable Bonum to finish already

started project.

While employed, he will use the amazing set of "divine" insights, and

when he accomplishes the mission, he will retire

Understandably, Bonum is mostly pleased with the last part of the offer. It would enable him to finish started, and engage in all those projects he already had in mind, but could only dream of realizing,

now,

he decides to accept.

-:-

Zoë
experienced

something that has never happened to her before,
she felt very strong stomachache.

Getting out all the things from the shelves, drawers, and closets, she

dusted, washed them, and cleaned the furniture, windows, and floors.
Pain grew even stronger. Finishing tidying, she laid down to rest.

As every other night,
soon after her, cat Wichien-maat jumped to bed.

Never before, only that one night,

cat did not go
directly to her favorite
place

bellow Zoë's feet

where

she would sleep all night,
but
walked slowly, and laying carefully

right over the spot where Zoë felt the pain

cat started to purr.

Through the sound of Wichien-maat’s purr Zoë's pain

slowly weakened, to soon completely disappear.

At that moment, Wichien-maat got up,

stretched lazy, and went back

to her favorite place,

twisted inwards
and
fell asleep.

Professor Pythagoras

Greatest of all

“Wise Man” prophets

is Edgar Casey.

Over the course of more

than forty years, two to seven times
every day
he would bring

hypnotic trance upon himself,

to be able to profess.

His mother would then ask him questions different persons wanted to know
answers to,
where and how their dear ones are, how some events happened, or will happen, and
the stenographer would document what he would say.

Edgar's astral body would then "visit" particular person, or time/space

witnessing required event, and then report back

what it witnessed.

Finishing the séances Edgar did not remember

the report, as if his astral body

"acted" independently.

Prophecies that Edgar made, more than 14,000 of them, were then printed and saved,

whence

the records of his first 7000 - 8000 prophecies have disappeared.

Once, his astral body visited the King's chamber of Great pyramid in Giza, and

witnessed that Egyptians used a combination of various architectural elements

as an alphabet of the messages they left for the coming civilizations,
and he discovered

that his astral body could comprehend their meaning.

One of the messages his astral body
encoded

is:

starting with year 2038

most “Wise Man” will “evolve” to beings

with 12 chakras*, instead of only 7

that we have now.

-:-

From "Wise Man" consciousness:

*Chakras
are the energy centers
each soul, in the final instance, uses
for the organization into
the appearance
of
the human being,
and its communication within

Starting
with high-school days Zoë
systematically learns more about the world,
and becomes painfully aware of all accumulated troubles

her civilization is in,

She knows that many of the earlier civilizations

of the Earth developed, blossomed

existing,

Zoë

is
constantly

bothered with lasting longing

to restore the beautiful sensation of limitless freedom

she felt in her childhood when she was one with herself, children, elders, animals,

plants, birds, all the elements, and the whole universe.

Since the moment she became aware

of all sufferings, poverty,

accumulated

in her own life, world,

her joy weakens.

She does not

want to

let
the
world,

and her own

morals, ethics, rights, just die out.

She is still young, and her own civilization is just taking

its first more firm baby steps.

Repeating attempts to share this concern, she becomes aware that 99% of the

world population feels the same.

She phones, sends e-mails, faxes, letters, to the United Nations, Missionaries Of Good

Will, Nobel Prize Laureates, Academics, University Professors, Unicef,

Unesco, Amnesty International, Red Cross,

the United Way,

Different Religious Organizations, but gets

NEITHER ONE REPLY.

All her desperate attempts to get in personal contact with them,
fail.
She meets only barriers.

All the bridges are destroyed, fenced, militia, army, or security guarded,

to impenetrability.

She is losing orientation within the bureaucratic labyrinth.

Pyramids of stone and paper Oil, Machines

and Cement are

spreading throughout the “Wise Man”

being,

efficiently preventing

communication

between the

“Wise Man”

hearts

and

heads .

“Wise Man’s”

millenniums long

head and heart song stops.

Chapter 3

# Imperceptible

Although Zoë and Nikola
attended the same High School, they didn't know each
other very well. After the graduation, Nikola's family moved to the other part
of the city, to live closer to their businesses and his college. Zoë and Nikola didn't
see each other for a couple of years.
Zoë remembers all the times when she attempted to meet him trying hard to organize
in advance every single detail of it, however, some strange unpredictable strain of
circumstances would always change her plans and their intended meeting
never happened.
He was thinking of her often, but he thought that he has absolutely
no chance to get closer to her, and he decides to use every chance
to get further away from her as possible. He would prefer
not to see her at all although he knew that was
impossible,
so passing quickly by her, he would almost
whispering disperse polite hellos.
Today, the destiny finally
decided
to meet them
equally unprepared,
and completely surprised,
at the entrance of the university's amphitheatre,
they bumped into each other.

Zoë turns angrily ready to clearly sentence the one

who dares to act so carelessly,

but, seeing him, she is unable to say a word cause

she recognizes Nikola, who is now more mature

tall young man, with dark brown hair

and a beautiful green eyes.

And,
instantly,

two young loving energies, hearts,
and souls bonded together, uncompromising,
rarest of all, insightfully blissful,
love
at first sight.

space craft

hurried along the trans-universal highway.

In control of the ship is Bonum, himself.

He is traveling toward small blue-green planet Earth orbiting

through one of the suburban regions of the Milky Way Galaxy...

Tired, yawning, and very hungry, he is wishing to return to perfectly

controlled chaos of his study room, and, naturally, to a cup of the

warm space chocolate.

Ship safely arrives into the Earth's vicinity. Ten minutes

prior landing, he carefully controls the flight
avoiding to repeat mistake his predecessors
made at Roswell, whole Galaxy
informed about,

and since

teaching young ones how to do it properly.

Entering the Earth's atmosphere above the northern part of the

North American continent, ship performs

time-space "jump."

Flying

over the Rocky Mountains

Bonum lands his space craft precisely at

the predetermined destination

Coming out

of the space ship

this world embraces him.

“Wise Man” is opening his

“Big Ship Of Steel’s”

heart to him.

The Rigveda

Sanskrit: gveda, a compound of c "praise, verse" and “veda”, “knowledge”,

is an ancient Indian sacred collection of Vedic Sanskrit hymns.

Rigveda is one of the oldest texts

of any Indo-European language.

Philological and linguistic evidence

indicate that the Rigveda was composed

between

1700 – 1100 year Before Christ,

the early Vedic period.

in the north-western region of the Indian subcontinent,

It is one of the four canonical sacred texts (śruti) of Hinduism known as the Vedas.

Numerous hypnotized people remembered

"I think of these experiences

as a crossing over between the material world

and what in Eastern philosophy is called the subtle realm.

Like a reified “mystic's journey,” experiencers describe

being brought into another dimension of reality from

which a new perspective on life on Earth is possible.

Sensitivity to our dysfunctional ecological

Being in AD 2749, Al Bielek

learns that:

The humankind is not using money,

Earthlings live in the cities that are built on the ground,

some are floating" high above the surface of the Earth, some are built under water.

Man has sufficient knowledge of the anti-gravitational force,

and

Early
in his life

Nikola decides

to take the path of

science in life.

Nikola asks:

“Am I

living within the

“material” or a “physical” realm”?

And he conducts

the most thorough scientific research

ever conducted.

-:-

Nikola
proves
that
the
word

“physical”

has its origin in Greek language.

Homer, Greek poet who lived 850 Before Christ,

in the book that he wrote, “The Odyssey”

for the first time ever

uses the word:

φύσις, physis.

Odyssey 10.302-3

Homer's text:

ὣς ἄρα φωνήσας πόρε φάρμακον ἀργεϊφόντης

ἐκ γαίης ἐρύσας, καί μοι **φύσιν** αὐτοῦ ἔδειξε. Translation into english:

"So saying, Argeiphontes “Hermes gave me the herb,

drawing it from the ground, and showed me

its nature.” (ed. A.T. Murray)

-:-

Nikola
also proves

that the word

“material”

has its origin in

Proto-Indo-European language.

Word

Mater

means Mother

The Proto-Indo-European language (PIE)

is the reconstructed common ancestor of

the Indo-European languages, spoken by the Proto-Indo-Europeans.

The existence of such a language

has been accepted by linguists for over a century,

and reconstruction is far advanced

and quite detailed.

-:-

SCHOLARS

THINK THAT THE

PROTO-INDO-EUROPEAN LANGUAGE

MAY HAVE BEEN SPOKEN AS

A

SINGLE LANGUAGE

AMONG THE HUMANS LIVING

THROUGHOUT THE EUROPE AND ASIA

AND THAT THE DIVERGENCE

HAD BEGUN AROUND

3700 YEARS BEFORE CHRIST

-:-

Estimates

for the start of divergence

by different authorities

vary by more than

1000 years.

-:-

-:-

Thus

Nikola scientifically

proves

that

BY FAR OLDER

OF THIS TWO WORDS

MATER AND PHYSIS

is

MATER,

Mother

IS

THE WORD

THAT HUMAN BEINGS USED

WHEN THE HUMANKIND SPOKE

A SINGLE LANGUAGE

THAT EXISTED BEFORE

-:-

From “Wise Man” consciousness:

It

is fair

to say that in physics,

there is no broad consensus as to a

general definition of matter,

and the term "matter"

usually

is

used

in conjunction

with

a "specifying modifier."

The
deepest problem
in theoretical physics is

harmonizing

the theory of general relativity, which describes

gravitation

and applies to large-scale structures - stars, galaxies, super clusters,

with quantum mechanics,

which describes the other three

fundamental forces

acting on the

atomic
scale.

Our

"physical" space

is observed to have only three space dimensions

and taken together with time as the fourth dimension,

a physical theory

must take this into account.

However,

nothing prevents

a theory

from

including more than 4 dimensions.

In the case of string theory, consistency requires

space/time to have 10 (3+1+6) dimensions.

The conflict

between observation

and theory

is

“RESOLVED”

by making the

unobserved dimensions

COMPACTIFIED.

-:-

“Singularities”

are avoided

because

the observed consequences

of "Big Crunches"

never

reach

zero

size.

-:-

In

fact,

SHOULD THE UNIVERSE

BEGIN

A “BIG CRUNCH”

PROCESS,

STRING theory DICTATES

"that the universe could never

be smaller

than the size of

a string,

at

which point

it would

begin

expanding."

Theoretical physicists were troubled

by the existence of five separate string theories.

A possible solution for this dilemma was suggested at

the

beginning

of what is called

"the second superstring revolution."

in the 1990s,

which suggests that the five string theories might be

different limits

of a single under lying theory, called

M-theory.

To this date this GLOBAL SCIENTIFIC PROBLEM remains unsolved.

Linguistic Contributions to the Study of Mind (Future)

“I tried to give some indication of the topics that

seem on the immediate horizon today,

as a kind of synthesis of

philosophical grammar and
structural linguistics
begins to take shape.

Each of the major traditions of study and speculation
that I have been using
as a point of reference
was associated with a certain characteristic approach
to the problems of mind;

we might say, without distortion, that each evolved
as a specific branch of the
psychology of its time,
to which it made a distinctive contribution.

It may seem a bit paradoxical
to speak
of structural linguistics
in this way,
given
its militant
anti-psychologism.

But the

paradox is lessened

when we take note of the
fact that
this militant anti-psychologism
is
no less true
of much
of
contemporary psychology itself,

particularly
of those branches that
until a few years ago
monopolized

the
study
of use and
acquisition of language."

We live, after all,

in the age of

"behavioral science,"

not of

"the science of mind."”

GAIA

Γα□α, GAIA IS THE PRIMORDIAL DEITY IN THE ANCIENT GREEK PANTHEON,

Γα□α, GAIA IS THE MOTHER NATURE, THE EARTH MOTHER, MOTHER TITAN, OR GREAT

TITAN.

The earliest reference to the term is the Mycenaean Greek ma-ka, ma-ga, "Mother Gaia,"

ancient Greek Γα□α, Gæa, Gaia, or Gea "land" or "earth."

Mycenaean Greek is the most ancient form of the Greek language,

spoken on the Greek mainland, Crete and Cyprus

in the 1600 to 1200 years Before Christ.

Hesiod's Theogony tells:

AFTER CHAOS

AROSE BROAD BREASTED GAIA

THE EVERLASTING FOUNDATION OF THE GODS OF OLYMPUS

She brought forth Uranus, the starry sky, her equal, to cover her.

Then she brought forth the hills, Ourea, and the fruitless deep of the sea, Pontus,

“without sweet union of love,” out of her own self, through the parthenogenesis*.

Afterwords she lay with her own son, Uranus, and

bore

The World-Ocean, god Oceanus.

And then only she gave birth to all the other Gods of the Olympus.

shows that your whole situation

is proliferated with the spirit of learning,

discovering and mental activities

of all kinds.

In those times

use your mind,

and enjoy

pleasures
of
intellect.

Actions:

Analyze the problem

Pretest your faith

Explore the facts

Teach yourself,

Teach others

See through

everything

Be truthful:

Be honest

Do right

Accept responsibility

Allow different thinking

Be steadfull:

Refuse

to be discouraged

Its inhabitants had developed the most

Today,

Throughout the year a great number of tourists are visiting it, cause

all sorts of events happening
every day and night.

These people are friendly, wearing traditional multicolored weavings, chewing on food,

-:-

Making their way

through tall grass and bushes, Zoë, Sing and Nikola

became tired and thirsty. Their linen clothes hindered their movements, and

their hiking shoes stumbled over the higher clod; backpacks are heavy for their long untrained bodies.

They started climbing, noticing that the grass becomes shorter. The ascent is sharp, sun is hot, and

the air is becoming thinner and more precious.

They decided to make a stop on the first plateau they find, but there were

none for quite some time now. Terrain is constantly steep, and

uneven, mountain sides transforming into the new ones.

Periodically, they saw lizards, snakes, and rare

mountain flowers, but neither

one condor yet.

Finally coming to the

small plateau

they made a rocky hearth,

fixed some dry meat, and vegetables on sticks.

Taking a few sips of water from their bottles, they checked

their current position on GPS, marked it on the map and calculated

that they have four more hours to walk to reach the destination.

Carefully extinguishing fire, they packed and moved on.

Reaching their destination before dusk,

they decided to examine the area

From

:˙:

Siddhārtha Gautama Buddha

Śākyamuni

Sage of the Śākyas

is born 563 Before Christ, (died in 483 Before Christ)

in the small state of Kapilavastu,

what is now Nepal.

Reaching inner state of enlightenment,

he is teaching primarily throughout regions of

Eastern India such as Magadha and Kośala.

After realizing that meditative jhana

is the right path to awakening,

but that the

extreme asceticism didn't work,

Gautama discovered what Buddhists call

the Middle Way, a path of moderation
away
from the extremes of self-indulgence

and self-mortification.

-:-

Before all that,

six year long period

he spends

in

meditation,

while

practicing

various kinds

of

ascetic disciplines,

mortifying his own body

in his own intentional effort

to subdue his own ego.

After this 6 years

Such was his emaciated appearance that
Sujata believed him to be a spirit

that had granted

her

a wish.

Following this event,

Gautama is famously seated

under a pipal tree,

now known as

THE BODHI TREE,

in Bodh Gaya, India,

when he vowed

never to arise

until he had found the truth.

At the time of his awakening

he realizes complete insight
into
the cause of suffering,

and the steps

necessary

to eliminate it.

These discoveries became known
as the

"Four Noble Truths,
which are at the heart

consisted mainly of limestone. Search area is weakly grown with high altitude vegetation, terrain rich in depressions with lakes and caves, that are leading water to the lower mountain levels and to the valley bellow.

Zoë, Nikola and Sing checked the whole ground level of the area finding nothing, so now they have two remaining caves to search.

During their studies, as a team, they had to search through the caves for a hidden important clue needed for the completion of their research project. The first cave is too small to hide the space ship, and they continued toward the second one.
Its entrance consists of a big rocks covered with moss.

Entering the cave they find a path of slightly uneven stones. Turning the corner, terrain began sloping a bit and wet walls narrowing, so that they continued one after the other.

They now turn their helmet lamps on.

Hiking boots are wading through the shallow water stream that makes often turns. Reaching a part with even greater slope cave trail brings them to a huge chamber whose ceiling and walls are full of brilliantly shining moist quartz crystals. It all resembles the starry sky. On its other end

path divides into three tunnels.

Deciding to follow the stream, they are continuing search through the middle tunnel.
Merrily lapping against the walls, stream turns sharply to the right, and the group had to squeeze through its really narrow part that begins to climb southward.
They are now standing pretty high above the enormous chamber with numerous

stalactites and stalagmites.

On its central part they found very deep
underground lake watered by two other streams;

one is merging
from the aspect of love,

the other one from
the time of the cave.

They now
rest.
-:-

Zoë, Nikola and Sing take out diving suites from their backpacks. Putting on the whole diving equipment they start diving toward the center of the lake gradually increasing the depth. After a slow peaceful descent through ever darker water they have passed two hundred feet depth. Their powerful battery lamps enlighten the clean lake water that is now a bit warmer as they dive toward three hundred feet depth. Nikola points out to Zoë, and Sing the pale lights he saw shinning some two hundred feet, Eastbound. Slowing down, they are almost sinking through the warm water, until they touched the bottom. Now they could see, they are much closer to an orderly row of lights surrounding an elliptically shaped space. Depth meters are showing three hundred thirty one feet. Water temperature is 23 Celsius. Walking over the uneven rocky bottom they came closer to the space ship. Those lights that were changing their intensity, color and order, appear to them like ascended in space because the space craft's body remains invisible to them. It is neither reflecting, nor refracting light. They concluded that it is probably some kind of an energy field forming the ship's exterior.

Naturally,

Nikola wanted to find out what kind of energy field is surrounding
the space ship,

so he approached the ship and extended his arm in attempt

to “touch” its "surface.”

Next thing

all

experienced
was the incredible
lightness.

-:-

Feeling
could have been
compared
to a zero gravity without

the annoying free floating effect.

THIS IS DIFFERENT.

They feel completely weightless, still

somehow able to feel and control
the position and the
movements of their bodies.

They became aware that this
state
of their consciousness
gradually changes

and

that they could

NOW

start differentiating the
outline of some big object

that contains
a few smaller areas
within it.

In a moment

their "vision" begins to clear up even more.

Like, floating out of the fog, in front of them they saw a

house, and lower, on its beautiful terrace two smiling persons

comfortably sitting at the four leafed clover shaped green

marble table, across from all three of them.

-:-

Nikola Tesla channeled the possibility of existence of
zero point energy generator,
generating freely

accessible

energy existing

everywhere in space

into collective human consciousness

Since, many able human beings are trying to channel

its principles, production and use within this “Mater”-ial realm.

Chapter 6

# Reason

"Completely aware of the possibility
that he could not manage to get out of the building that was
already almost whole caught up in flames, he makes his way through the
smoke and hollow roar of the fire that devours everything on its way. Through
crunching of diving rafters in flames that are breaking and burning everything beneath
them, irresistibly, he penetrates through the unbearable heat that burns his lungs,
through
gray-black poisonous smoke and noise, sure to hear someone's weak call for help from
yet unchecked part of the building. Strongly swinging an axe, he tears out the heavy
door of one of the last remaining rooms and carries the suffocating old woman.
Both of them are being showered by refreshing drops of water until
the moment they got out of the building onto he day of light,

ALIVE.

-:-

-:-

Nikola "touched" the space craft,

and moments later they appeared sitting at the table on the terrace, and the taller man

they saw sitting across the table, beside their friend Pythagoras, introduced himself as
Bonum.

He said:"Zoë, Sing and Nikola it presents an exceptional pleasure and honor

to be acquainted with you."

His thoughts continued reaching minds of all the listeners:

" On the planet
that I am coming from
this is
the way we communicate
from the day we are
born."

"How do I know what is he thinking, when he does not move his lips at all?

"How could I percept this voice, and imagery in my mind, when Bonum is not talking?"

"Telepathy?"
they were all asking
themselves.

"Surprised?"

the voice in their minds continued," it is not that difficult."

Now he sounded his thoughts, "We might continue our communication orally, if you prefer?"

"No," they almost jumped from their chairs.

"Please continue, we would like to learn this way of communication."

“I will continue,” communicated Bonum, “and teach you

as we go along.”

“Please, let me first explain the reason

for my appearance here.”

“When The Universal Consciousness evolved,

it realized The Space Gardeners, beings that are forming teams, and each

of this teams taking care

of the particular sector of the universe.

Elm Thorohm appointed me

to help the Earth.

I will solve its main problems,

and create the system that is allowing

the most fruitful course of events, in peace.”

All listeners were quiet, but the stream of sufferings, destruction,

and deaths crowning Earth’s history they had in their experiential memories, reaches him.

Bonum

understands,
and

as many men before,

this experience brakes his heart.

Silence over the world.

-:-

“I am hoping that you would join and help the mission.”

Bonum communicates telepathically to listeners
sitting around
the four leafed green clover table.

The

“voice” in their heads
belongs to the appearance of an
average older man, so boringly average that

passer by
tends to forget before
even seeing
him.

“When some catastrophic event

wipes out

the life from
the
face of the planets,
we
are the ones restoring it back.

You can compare us with gardeners.

We are taking loving care of our garden.

We have also created and cultivated

the blue-green grain

of watery soil,

and
all
its life

forms, you
call the Earth,
within
much greater garden,
and many

other planets and

processes throughout the universe.

All life forms that we explore, we take good care of,

evolve and interact with all the other species

creating equilibrium

within

the whole environment.

No matter how grand or complex one might perceive

this

“garden” to be,
The Space Gardeners
are accomplishing
this mission.
-:-

"This time,”

Bonum communicates

now

"I am here to prevent war, and

establish the peace and love within

“Wise Man” social organism,

curing

every “Wise Man”

being

organism,

your individual

being’s heart,

your lovely planet,

so that the song of all my children,

my angels, birds and musicians

will sound lovely again

in my own

heart.”

-:-

"How

will you do it?” asks Nikola

"I am engaging all enlightened “Wise Man.”

"Why do you think these humans will support this idea?”

"Some time ago we introduced the

completely new
aspect

to the human psychological development,

the

"Psychohistory,"

and gave humans time they need

to psychologically develop to that level.

All the world's traditions profess this moment.

It coincides with the time of our arrival,

with the time when we are all
starting
this project together.

Love
is the process

now

starting

realization in this reality.

Together ,
"Wise Man", and me,

are its "tools" of realization.

Any event, you know, could be explored
from infinitely many aspects, depending of

the observer's
`standpoint` . `perception`

Time for it is "ripe", suggests Zoë.
Yes!
I have established
"Bonum Centers" throughout
the world, the

rejuvenating fountains
within the good
“Wise Man”
hearts.
-:-

Teams are introducing new understanding, the evolving approach to

educational, organizational, and environmental aspects

of the “Wise Man” existence within this

three-dimensional, “Mater”-ial

realm.

With my help

The Space Gardeners

are harmonizing this realm

within

all the other ones.”

-:-

If
we approach

the existence of all existing

life forms

within the “Mater” -ial realm

from the organizational

standpoint,

we can conclude

that it is polarized.

HOWEVER,

DEPPEST
WITHIN
the

“Wise Man”

subconsciousness

is a memory of

the one
supreme existence,

the creator of the entire existence

eternally existing without, and

within all the realms,

Singular-ity

The Supreme Consciousness, The Supreme Love.

Longing for the restoration of this experience is expressed throughout the
"Wise Man” Explorations

Scientific . Perception . Religious

in Life
-:-

Now,

let us think

about the basic organizational, and
functional principals of the human specie:

The Mating PAIR is organized around different principals;

Females

have a need to mate and produce offspring,

and support them "growing up

and becoming independent"

to be able to fulfill their own life mission, and

Males

have to provide the basic means

of their family's survival,

security, shelter, food

To be able to fulfill their own life mission.

From their different aspects,

both

female and male principals

organized in a beings within the `Mater`-ial realm,

are superconsciously, consciously, and sub consciously
"aware" that
LOVE
is the only way of producing offspring.
the
only way enabling “Wise Man” specie

to “remain” and “last” within this

“Mater”-ial realm.

Poor people are there getting free warm meals daily.

Dream Town's Pigalle.

she walks
up and down the street,
waiting for some rich man
who would desire to
spend the night
with beautiful
young girl.

Walking
faster, she tries
to prevent
cold chilling her bones.

Pimp took all the money
she earned last night,
and now she’s hungry.

Nights don’t allow
so much needed,
peaceful rest.

Well
of thoughts
of a world
without money,
prostitution,
misery,
crime,
suffering,
hunger,

wars,

she
used to dream of
every single night,

just died out;

Everything
becomes
hopeless.

Time passes,

days are turning

into
weeks,

months, years,

she is twenty five
now
still "working the streets.‘
For five years now she lives in
rented, lowest budget, east side hotel's room.

Through her room's window, she could see dirty back lane,
a row of dumpsters, graffiti on ancient building walls,

“street people”
freezing
to
death;

“shooting,”
smoking,
sniffing
and swallowing

all sorts of
drugs

just

to survive shame
they feel
seeing
“rich people”
not wanting to help,

blind and deaf
to any
pain

but
their own.

Her hotel is the same story,
armed, old receptionist,
“sitting safe
in a cage
of heavily
protected booth”

Loudly screeching
narrow wooden stairwells,
damaged doors without door knobs,
leading to a dark narrow hallways
with countless rooms
from which at
any time,
you are hearing
coughing, arguing, running,
screaming, beating, and the fire arm shooting sounds.

And cries, cries, cries, cries, cries.

Police, ambulance, and the fire truck sirens, vehicles, and
their rushing crews, is common experience here.

If anybody imagines real

biblical hell has

this life
in mind.

State of constant desperation, she describes:

”I am torpedoed submarine, with a dark hole

in my double layered steel in the shape

of a beautiful rose,”

she laughs bitterly sometimes,

“engine rooms burning,

navigational, power systems,

and almost all the crew members,

are dead, and my submarine is

now diving over the edge

of abyss.”

One day,
while sitting at the table in her hotel room,
drinking coffee, and making same boring preparations
for the night's "street job,” she experiences the sensation
embraced by her whole being.

From within her magnificent spiritual space the light
energy allows her an insight into the experience
of the interweaving universal life giving
energies and processes
internally creating
live symphony
of love

Every
problem
she faces, reveals now
its inner cause, it’s logical explanation.

Sensing her being spiritually alive, the universal love starts shining

from the centre of her heart, summoning purest energy of love.

Methodically, analyzing her whole life
now, finally she is able to
clarify her misty past.

Bright light of hope
helps her finally visualize
solutions to all her problems.

She now sees the light at
the end of the
tunnel,

and

the

steps
she will take
changing her life.

Beautiful feeling of happiness
shyly builds nest in her heart.

While waiter serves customers of a charming restaurant,

splashes the surface one of the tables.

Cheerful conversation
and heartfelt laughter
beautifies whole ambient.

Few tiniest wine flies circle over tables

mainly invisible

to people enjoying their meals, and

companions.

Fly's amazing tiny body

beautifies a pair of wings

that are allowing them

very precise

flight.

Such a fine positioning in space and time
enables swift fulfillment of their mind.

One of the flies heads toward one of the restaurant tables, and flies through the

soft narrow

beam of a beautiful restaurant lamp's light.

It refracts through her intricately composed tiny wings,
in such a dramatically astonishing way.

This time, the infrared range of the spectrum differs from its nature.

In

act in a characteristic way,
it
sends the wrong information

about the stimuli.

Fly brain's
information processing centre

informs
its whole
being

that the “hilly” table area is hard and safe for landing,
instead of, "hill" consisting of water.

Landing, fly contacts the water surface which quickly bends under her weight and forms the water socks that grip fly's legs with its super strength.

As the water socks

are part
of
the water wave
that is moving down,

they are also moving down,

and pulling fly's legs uncompromisingly

down,

now

bellow the level of water surface, as a tact of a wavy atomic mass

dance movement.

Fly
is
devastated

cause of the
Water Spirit's
behavior,

so she can not move.

She is paralyzed,

going down the surface line,

and under.

At

this
moment

she senses

the enormous cylindrical wooden object diving bellow her,

and its wave moving her upwards,

a bit away from the log.

Still a bit frightened, she now feels

that water spirit "changes his mind"

and grants the enormous power of hope to radiate from her own heart,

moving within her upwards her head above water surface,

and she is swimming strongly now,

reaching and climbing up

on top of the log.

# Absolution

From “Wise Man” consciousness:

“The Emerald Tablets.”

This is Arabic translation:

1. It contains an accurate commentary that can't be doubted.

2. It states:

What is the above

is from the below

and the below

is from the above.

The work of wonders is from one.

3. And all things

sprang from this essence

through a single projection.

How marvelous is its work!

It is the principle part of the world
and its custodian.

4. Its father is the sun

and its mother

is the moon.

Thus the wind

bore it within it

and the earth nourished it.

5. Father of talismans and keeper of wonders.

6. Perfect in power that reveals the lights.

7. It is a fire that became our earth.

Separate

the earth

from the fire

and you shall adhere more

to that which is subtle

than that which is coarse,

through care and wisdom.

8. It ascends

from the earth

to the heaven.

It extracts

the lights from the heights

and descends to the earth containing the power

of the above and the below

for it is with the light of the lights.

Therefore the darkness

flees from it.

“The Aquarian Age Gospel of Jesus, the Christ of the Piscean Age”

is a book by Levi H. Dowling, first published in 1908.

Levi H Dowling speaks:

“I transcribed the text of the book from the Akashic records*.

This age will comprehend

but little
of the works

of Purity and Love

but
not a word is lost
for in the Book of God's Remembrance*

a registry is made

of every thought

and deed.

And When the world is ready to receive

Lo God sends a messenger

to open up the book

and copy from its sacred pages

all the messages of Purity and Love

- Aquarian Gospel 7:25-26

-:-

Explanation:

Jesus takes the role of The Christ,

but is not automatically Christ
by nature

By making himself

through effort

and prayer

a fit vessel

Jesus enabled The Christ

to dwell within him.

Christ is therefore used as a term
for the perfect human being that Jesus exemplified,
a human being that has been "Christened" (anointed) and therefore made holy.

Jesus came to earth to show the way

back to God

by his lifestyle and teachings.

He is the example we must model our own lives after,

if we seek salvation.

Reincarnation
exists and is
the explanation
for various seeming injustices.

Reincarnation allows souls
to settle debts

they have

incurred

in past lives.

Humanity has forgotten God

and is currently

working its way

back to fully remembering God.

Time is
separated into ages.

These ages last approximately

2,000 years.

We are now nearing the start of Aquarian Age.

All souls will eventually mature and become perfect,

like Jesus

thus
ending the cycle of reincarnation."

No soul is ever abandoned by God.

From "Wise Man" consciousness:

Aether*

The word α□θήρ, aithēr, in Homeric Greek
means "pure, fresh air" or "clear sky."

Greek mythology states:

Aether
is
the
pure essence
where the gods live
and which they breathe,
analogous to the air
mortals breathe,

personified
as a deity Aether,
the son of Erebus and Nyx.

It corresponds to the concept
of Akasha in Hindu philosophy
WHICH SAYS:
the omnipresent "Brahman"
which is permanent and permeates
and sustains
the material form of
the universe.

-:-

From "Wise Man" consciousness:

In Plato's “book” “Timaeus,”

Plato says:
God uses aether to delineate the universe.

Aristotle, Plato's student at the
Akademia

included aether in the system
of the classical elements
of Ionian philosophy,

Aristotle speaks:

Aether
is
the
"fifth element"
the quintessence,

the four terrestrial elements
(earth, wind, water, and fire)

are changing,
and moving naturally
in straight lines,

while no change is observed
in the celestial regions, and
the heavenly bodies
move in circles.

In
Aristotle's system

aether had no qualities,

was

neither hot, cold, wet, or dry,
was incapable of change,
with the exception of
change of place,
and by
its nature
moved in circles.

One night
Sing is dreaming
to be drawing a huge
short bearded
man's
portrait on the stony floor.
In a dream he makes a short dark, almost
parallel strokes with his pastel, drawing a huge
narrow man's sideburn on a stony floor, leaving a

"breathing space"
in between the strokes.

As he moves his pastel down toward the place
where he intends to make the next stroke,
something flies into the area of his
focused attention.

He catches it

in its flight

with the other hand, and
releases it downwind, still focused on
making the next desired stroke.

As he moves his hand
toward the place where he wants to draw
the next line, he senses the same thing happening again,
only his attention is not completely focused back on the drawing
surface yet, so he realizes that the five foot long unbelievably beautiful
transparent curly hair lace, same as one flying by seconds before, lands briefly
hitting the floor, before it bounces upward to continue flowing down the air stream.

This time, he is able to notice that at the spot where the flying hair lace touches the
floor,
for only a blink of a dream-time, on the exact area where he is planning to make the
next stroke

it leaves the finest pale green glow in the shape of his next stroke.

He realizes that some will sends the most beautiful hair laces so precisely down the wind knowing
exactly where he will place his next stroke with the pastel, when he will do it, stroke's length, and

even the imperfect width of the strokes slightly curved lines.

In a dream Sing is now attentive enough and he concludes that the line that is "drawn" in the
pale greenish light on the floor by downwind flying hair laces could only be “drawn” by

an advanced being able to control the dream realm.

He turns his eyes from the drawing upwind, and experiences an appearance of
an intricately dressed, semi transparent fairy picking one by one of her
own up to the floor long, beautiful transparent curly hair laces

enshrining myriads of micro sources in all colors of

light ready to send them downwind
to help
him
make the perfect drawing.

Miracle

-:-

Sitting one day in his favorite café,

Sing overhears this conversation:
1. “Did you watch the news today?”

2. “ You mean about the new wars that are starting?”
1. “I am asking myself are the wars ever going to stop?”

2. “I asked myself the same question for a long time.

One day I reached the tipping point, and asked

myself, would I do better if I ruled the world.

Imagine I am born as the son of the richest,

most influential man in the world, and

I am being

taught by the best,

most conscious “Wise Man”,

existing on this planet.
Finishing education,

Now

I

am

the best taught,
person with the most,

most advanced consciousness

of all existing “Wise Man”

My father, world’s ruler

is old, tired, and
wants to retire.

NOW

he tells me:

“Dear son, 50 years ago

your grandfather, my father, told me

Dear son, when I completed my education my father told me:

when I was born

the whole world was in big turmoil, and

I did not want my children to live their lives

in constant wars, suffering, and problems,

so, I conquered this world

to make it a better

place to live,

for my sons, my family, and

for all the people of this world.

Many brave, clever, and wise man

I had an honor to have met, I still

have as my friends, and allies.

Throughout the history,

many man

had
the
same
idea,
as my

grandfathers

my father, and me,

but neither one of us

managed to reach the aim,

to unite the world, and bring

and establish Peace and Love

for

ALL CHILDREN OF MAN.

Neither you, my son will succeed

but, in the name of God of all Man,

in the name of all men

that gave their lives

so all women, children, and men

will live in peace and love,

my dearest son

do your

best.

The Project's executive phase:

Sing's team selects the best technological

solutions for the acute global technological problems.

Zoë's team, cooperating with Nikola's and the Sing's teams

and the scientific research institutions from around the world

develops a number of complete station models to be used

as the primary bases in "terraforming" processes.

They

developed and produced all the necessary assembling
parts for docking, living, communicating, research,
medical, storing, recycling, all-purpose workshops,

and other base's areas, as well as zero point
energy generating units, that are producing
electricity sufficient for all their needs.

They
prepared specially concentrated food.

From "Wise Man" consciousness:

Max Heindel speaks:

In our civilization

the chasm that stretches between mind and heart

yawns deep and wide

and, as the mind flies on from discovery to discovery in the realms of science,

the gulf becomes ever deeper and wider and the heart is left further and further behind.

Only when that co-operation is attained and perfected will man attain the higher,

truer understanding of himself and of the world of which he is a part;

only that can give him a broad mind and a great heart.

The man who realizes his ignorance has taken

the first step toward knowledge.

Christ said,

"The Truth

shall make you free,"

but Truth is not found once and forever.

Truth is eternal, and the quest
for Truth
must also be
eternal.

John Lennon song "Imagine":

Imagine there's no Heaven
It's easy if you try
No hell below us
Above us only sky
Imagine all the people
Living for today

Imagine there's no countries
It isn't hard to do
Nothing to kill or die for
And no religion too
Imagine all the people
Living life in peace

You may say that I'm a dreamer
But I'm not the only one
I hope someday you'll join us
And the world will be as one

Imagine no possessions
I wonder if you can
No need for greed or hunger
A brotherhood of man
Imagine all the people
Sharing all the world

You may say that I'm a dreamer
But I'm not the only one
I hope someday you'll join us
And the world will live as one

Considering its global character, next plan's phase

asks for additional number of new team members.

All candidates are in Pythagoras` home,

most interesting people .

After the

refreshments

Pythagoras and Bonum

are stepping on the shaded porch,

and Pythagoras introduces

his guest, and

Bonum speaks:

"Ladies and gentleman,

we are facing very complex

set of problems

your civilization is about to solve.

I am asking all of us to unite
as
the "humankind's team"

-:-

Nikola is
happy hearing the news:

The General Assembly of the United Nations approved

two resolutions presented by Bolivia, and her president Evo Morales.

The first resolution entitles “Harmony with Nature” and the topics
of the yearly World Earth's Summits that will be held on the
International Earth's Day, April 22nd, will include
methods

for promoting a holistic approach to
harmony with nature,

and the exchange of related national experiences.

This resolution says:

“human beings are an inseparable part of the Nature,

and they cannot damage it without
severely
damaging themselves.”

-:-

David Choquehuanca, Bolivia's foreign minister speaks:

"We believe

everything in the planet forms part of a big family.

We are being fed with the milk from Mother Nature, water.

All animals feed with the milk of Mother Nature… as do plants,

we work towards harmony among plants, people, animals,

we work for the balance of the planet.

We

have values and principles,

which have survived more than 500 years,

Among these values we could mention The Tama.

The Tama means big family, we all belong to a

big family,

and there is another value, there is
another principle
called

La Tumpa, and it tells us

there must be a compulsory control among all of us.

We are in the process of recovering principles, values
and codes.

500 years or more we are just resurfacing,

we are just rebuilding,

we even have financial systems
unknown to our universities and schools,

unknown to scientists and the world of knowledge.
Our grandparents had financial systems

to organize each home,

called Ceje,

and villages, called Colga.

Those principles could help us to rebuild.

But like everything, we have to

look at this as a whole."

-:-

-:-

Man made
most advanced,
"quantum computing"
Bonum instructed Dr Newman
to build ultimate computing system
having access to the “Akashic Records”
Twelve trustworthy computer experts joined

and these twelve quickly set up

this computing system.

-:-

Bonum`s mission then

introduces fair, and self-developing,

self harmonizing social system promoting happiness

establishing the most futile evolutional path

a thousand year long peaceful period

for the human society,

such a profound

quality of individual life
is
unknown

to “Wise Man”
thus far.

-:-

All

members of teams have given

their absolute best to realize the project.

Bonum decides to honor each one of them,

so he gets together Zoë, Nikola and Sing

and they arrange two week's holiday,

for all of teams members.

Arrangements are made,
and members are visiting places
in Iraq, India, Egypt, Jerusalem, Greece,
Mexico, Ecuador, Bolivia, Peru, Hopi Land, Tibet
Vatican and Chilandar, and myriad of tourist destinations
offering beautiful sunny beaches presenting them precious relaxation.

# Chapter 11

## Oneness

After a few

centuries long dream

Rafael opened his eyes

and saw transparent spirits

of all the living beings

through their countless

forms of appearance.

-:-

Bus's

wipers sang zimrg, zim-,zimrg,

taking the raindrops off the windshield to

launch them toward the puddles along the way

PERFECT NATURAL HARMONY

for this tact, composer uses:

-:-

driver of the bus

Rafael is driving in,

all passengers,

this bus,

the street,

windshield,

vipers and

raindrops,

puddles,

sidewalk,

and the air

as his instruments.

Performance is continuing:

“diving into the paddles

water drops are

forming

concentric
circle waves

which are ever growingly

moving the surrounding air

to create a stream of

slight breeze
that

sings

ever growing

concentric vibrations

that are sailing as a concession

in the speed of sound,

far

very

far,

slowly,

very, very, very

slowly
around
the universe,
as the continuation of

The Creator's

Magnificent Symphonic Masterpiece.

-:-

Rafael

gets off

at the next bus stop, and

eats pizza in just a few bites.

Thirsty, he drinks water
and wipes out his lips
with shirt's sleeve.

As

some beast,

he loves wildly
and falls asleep.

He craves sleep.

When he sleeps,

he learns,

the wake time is too short

for satisfying all his other needs.
He has to work to exhaustion,

often looses concentration,

makes serious mistakes

at work place.

Reducing his
working hours,
needs less sleep

loves his life

and

accomplishes

all of his

tasks.

-:-

Six months, a year,

then the second one passes,

of monotonous rhythm of life.

Only now he knows enough

about life of the Mother Earth and is

able to accomplish everything,

and the most precious time

he dedicates good,

helping other

“Wise Man`

beings,

they are all

his brothers and sisters

her grandfathers, and sons,

its mothers and daughters

his sons and his moons

we are all

love

of

life.

-:-

One day Rafael looks around

and realizes

he is living in a different city,

has a different job,

wears suits,

carries briefcase,

sleeps with a different woman,

knows how to drive,

and has different

name.

:

The changes are more frequent.

During his
recent

777 years of “Mater”-ial Existence

Rafael

have lived his 7 lives all over this world.

Harmonized with the life on the Earth
he doesn’t have to speak any more,
his heart is the most beautiful
divine song sensed
everywhere.
-:-

-:-

Already being enlightened,

leaders of the most populated countries

make an agreement of joining what

is now a global project
for peaceful life
of the

earth

starting

the process of

terra-forming, inhabiting

the other planets
of our galaxy.

-:-

Since peace

rules the world

for some time now,

our environment,

presents all of us

so friendly

granting newly realized

global village consciousness,

recycling materials,

wisely

regulating demographics

introducing clean energy sources,

and the fact

that millions of Wise Man is moving to

live

on the newly terraformed worlds.

“Wise Man” regains love

of his own Life
Mission
-:-

-:-

Telepathic
communication

is not technology dependent

and does not have its restrictions

"Wise Man"

sends his first telepathic message

and establishes first contact

-:-

"Wise Man"
again becomes
unbound.

## Chapter 12

Creation

First telepathic message addresses `Wise Man`

It communicates:

Is your planet healthy,

or at war?

Humans happily and proudly confirm
and the telepathic contact continues:

Delegation will visit your world soon to speak with you about joining
The Universal Federation Of Peace and Love.

Regular member of this Federation the Earth will become after you live your lives in

peace

for another 300 years.
